NEVERLAND

REQUIRES LIFESHIELD® CLC2000®

IN NEVERLAND

Catheter-related bloodstream infections (CRBSIs) are a national healthcare priority¹

- Extended hospital length of stay—up to 20 days²
- 50,000 die each year³

64% of nurses have been accidentally stuck by a needle⁴

- Risks associated with needlestick infection include HIV, hepatitis B and hepatitis C⁵
- OSHA has recommended needleless systems since 1992^{6,7}

IT'S TIME TO INVEST IN IV SAFETY.

LIFESHIELD CLC2000 MAKES IV RISKS MORE MANAGEABLE

- Prevents retrograde blood flow and reduces occlusion formation⁸
- Positive displacement further increases flush effectiveness⁸
- Compliant with federal and state OSHA needlestick legislation⁸

Easy-to-use, one-piece catheter patency device. Swabbable, latex-free and non-DEHP. Also features conventional luer-lock technology. Delivers high flow rate with low residual volume. As a premier catheter patency device, CLC2000 ensures control, convenience and safety for optimal IV drug delivery.
