# NEVERLAND

REQUIRES LIFESHIELD® MICROCLAVE®

## IN NEVERLAND

≈250,000 catheter-related bloodstream infections (CRBSIs) occur each year<sup>1</sup>

- Peripheral arterial catheter use puts children at risk<sup>1</sup>
- Zero reimbursement from Medicare and some private insurers<sup>2,3</sup>

600,000-800,000 needlestick injuries occur each year<sup>4</sup>

- Nearly 50% of nurses report being stuck by a contaminated needle<sup>5</sup>
- National nursing shortage exacerbated by needlestick injuries<sup>5</sup>

IT'S TIME TO INVEST IN IV SAFETY.

## LIFESHIELD MICROCLAVE MAKES IV RISKS MORE MANAGEABLE

- Maintains a microbiologic barrier proven to reduce contamination of CVCs<sup>6,7</sup>
- Minimizes discomfort for neonatal, pediatric and geriatric patients<sup>6</sup>
- Eliminates use of sharps with IV administration set<sup>6</sup>

*Diminutively sized, swabbable and latex-free valve. Compatible with universal luer-lock technology. High flow rate. Ultra-low residual volume. And, virtually no blood reflux. In needle-free IV drug delivery, MicroCLAVE provides optimal comfort, convenience and safety.*
