# MORE THAN EVER NEVERLAND

REQUIRES LIFESHIELD® SPIROS™

## IN NEVERLAND

IV therapy involves contact with unsafe materials

- DEHP causes developmental defects in young male animals<sup>1</sup>
- DEHP leaching may contaminate solutions<sup>1</sup>

Contact with hazardous drugs threatens healthcare worker safety

- Risks include skin rashes, infertility, miscarriage, birth defects and possibly leukemia or other cancers<sup>2</sup>
- More than half of nurses believe workplace safety negatively impacts personal safety<sup>3</sup>

IT'S TIME TO INVEST IN IV SAFETY.

## LIFESHIELD SPIROS MAKES IV RISKS MORE MANAGEABLE

- Contains swabbable, DEHP-free components for use with antineoplastic drugs<sup>4</sup>
- Maintains closed system to prevent leakage or contaminated air ingress<sup>4</sup>
- Increases safety when transporting hazardous drugs<sup>4</sup>

*One piece of maximum security. Active only when attached to standard luer-activated, needle-free connector. Fail-safe position in case of accidental disconnect. Because control and safety are paramount in needle-free IV drug delivery, Spiros provides proven reliability.*

PRODUCT	LIST NUMBER
LifeShield Spiros connector	20120-01
LifeShield Spiros connector with cap	20130-01
